

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A method for treating a microbe mediated dermatological condition in an organism, said method comprising:

treating an affected tissue of said organism with an agent which is capable of disrupting a microbial biofilm, said agent comprising guaifenesin.

2. (Canceled)

3. (Currently Amended) The method of claim 1, wherein said agent further comprises sonic waves.

4. (Currently Amended) The method of claim 1, wherein said agent further comprises an electrical field.

5. (Original) The method of claim 1, including the further step of treating said affected tissue with an antimicrobial compound.

6. (Original) The method of claim 5, wherein said step of treating said affected tissue with an antimicrobial compound comprises treating said tissue with said antimicrobial compound at the same time that the tissue is treated with said agent.

7. (Original) The method of claim 5, wherein said step of treating said tissue with an antimicrobial compound is implemented after said tissue is treated with said agent.

8. (Original) The method of claim 1, wherein said dermatological condition is selected from the group consisting of: acne, acne rosacea, and fungal infections.

9. (Original) The method of claim 1, wherein said affected tissue comprises skin.

10. (Original) The method of claim 1, wherein said affected tissue comprises nail tissue, and said dermatological condition comprises dermatophytoma.

11-19 (Canceled)
